PROFESSIONAL EXPERIENCE

Research Intern / FCT Field Coordinator – Direct Consulting and Logistics (DCL) *Jan 2026 – Jul 2026*

Supported programme, research, administrative, and field operations across multiple public health projects, including multi-state implementation research across FCT, Kano, Imo, Ondo, and Edo States.

Programme & Administrative Support

- Supported the planning, coordination, and implementation of project activities, ensuring timely follow-up on assigned actions and deliverables.
- Supported the preparation, organisation, and maintenance of project documentation, records, correspondence, and activity-related materials.
- Assisted with scheduling and coordination of meetings, field activities, orientations, and other project engagements.
- Supported communication and correspondence among project staff, field personnel, participants, volunteers, and external stakeholders.
- Assisted with travel and field logistics arrangements, including coordination of personnel, schedules, locations, materials, and other activity requirements.
- Supported procurement and operational processes, including coordination with vendors and follow-up on required goods and services.
- Assisted with participant registration, attendance documentation, field records, and other administrative requirements for project activities.
- Followed up with team members and stakeholders on assigned tasks, field activities, logistics, and outstanding requirements to support timely implementation.

Grant & Business Development Support

- Supported the identification and review of potential grant opportunities relevant to the organisation's public health work.
- Reviewed Terms of Interest (TOIs), Requests for Proposals (RFPs), and related funding information to understand donor requirements, priorities, eligibility criteria, and opportunities for organisational alignment.
- Participated in internal discussions on funding opportunities and contributed to identifying how the organisation's expertise and ongoing projects could be positioned in response to donor requirements.

YIELD – Youth Initiative for Enhancing Long-Term Delivery of HPV Implementation

- Supported stakeholder mapping, youth participant recruitment, orientation, scheduling, and preparation for field activities across the multi-state project.
- Supported the preparation and coordination of **project webinars conducted via Zoom**, including scheduling, participant communication, meeting preparation, and other pre-webinar activities.
- Coordinated FCT field activities and facilitated communication among project staff, youth volunteers, participants, and relevant stakeholders.
- Conducted quantitative surveys and supported qualitative Key Informant Interviews with stakeholders from health, education, policy, and community sectors.
- Reviewed completed questionnaires and interview records to ensure completeness, consistency, and adherence to study protocols.
- Coordinated field logistics and supported the timely execution of data collection activities.

SHARP & COSBIN Projects

- Supported data management, quality assurance, analysis, and reporting activities across public health research projects.
- Analysed survey datasets using SPSS and Microsoft Excel and prepared structured tables and analytical outputs for technical reports.
- Supported the preparation of project documentation, analytical outputs, and materials for reporting and dissemination.

Project Coordinator – Project 390 (*Environmental Sustainability Initiative, Abuja)* *Sept 2023 – Present*

- Coordinate planning and implementation of environmental sustainability activities, including tree nursery development and tree-planting initiatives.
- Coordinate with vendors, planting personnel, volunteers, and project stakeholders to support timely delivery of field activities.
- Organise activity schedules, site requirements, personnel, materials, and other implementation needs.
- Monitor field activities and follow up on outstanding tasks, operational requirements, and project deliverables.
- Prepare periodic activity updates and reports for the project founder.

Public Health & Research Analytics – Freelance *Oct 2020 – Present*

- Provide quantitative data analysis and research support to students and researchers at B.Sc., M.Sc., and Ph.D. levels.
- Analyse datasets using **SPSS and Microsoft Excel**, including descriptive statistics, Chi-square tests, t-tests, ANOVA, and correlation analysis.
- Support questionnaire coding, data cleaning, data quality checks, analysis, interpretation, and presentation of findings.
- Work with datasets containing more than **750 observations and 70 variables**, producing structured analytical outputs and research tables.
- Support more than 10 students and researchers with data analysis and research-related outputs.

Field Volunteer – Women Advocate for Vaccine Administration (WAVA)
Measles-Rubella (MR) Vaccination Campaign, FCT Abuja *Oct 2025*

- Supported community sensitisation and mobilisation activities across Bwari and AMAC during the vaccination campaign.
- Engaged parents and caregivers in English and Hausa, supporting understanding and participation in campaign activities.
- Supported coordination and communication with vaccination teams, community leaders, parents, and caregivers.
- Contributed to field monitoring and documentation of campaign activities.

Community & School Health Outreach – National Open University of Nigeria *Mar 2022 – Feb 2025*

- Supported planning and coordination of community-based public health outreach activities across underserved communities.
- Mobilised community members and supported health education, basic screening, referrals, and distribution of health information materials.
- Supported school health education activities across government secondary schools in coordination with school administrators and teachers.
- Facilitated health education sessions for adolescents on relevant health and wellbeing topics.
- Supported distribution of hygiene commodities and documentation of outreach activities.

SELECTED RESEARCH EXPERIENCE

Principal Investigator: The Role of Culture in Mental Health Stigma Across Nigeria's Six Geopolitical Zones | **Independent Research Project** *Apr 2026*

- Designed and coordinated a study examining the relationship between culture and mental health stigma across Nigeria's six geopolitical zones.
- Collected data from **427 participants** using Google Forms and conducted analysis using SPSS and Microsoft Excel.
- Coordinated data management, analysis, interpretation, and preparation of the research manuscript.

Undergraduate Research Project: Assessment of the Prevalence, Risk Factors, and Adherence to Preventive Practices of Obesity Among Young Adults (18–30 Years) in Nigeria |

National Open University of Nigeria (NOUN) *Jul 2024 – Feb 2025*

- Conducted quantitative research involving **636 respondents** to examine obesity and associated factors.
- Supported questionnaire administration, data management, statistical analysis, interpretation, and presentation of findings.

Collaborative Research Project: A Comparative Assessment of the Prevalence of Obesity in Adolescents and Effective Eradication Strategies in Nigeria and the UK. | *Sept 2023 – Apr 2024*

- Partnered with graduate students from the University of Leeds on a cross-cultural research initiative.
- Synthesized literature and data to analyze environmental and cultural determinants of health.
- Co-developed proposed intervention strategies tailored to socio-cultural contexts in both countries.
